Wattwise Solutions LLC

Multipoint Gas Calibrator

WW-AIR-008

A dynamic dilution calibrator using two mass flow controllers to prepare calibration mixtures for air quality analyzers. Up to four gas sources can be connected for zero and span calibration. Serial and Ethernet communications support integration with the calibration workflow of an ambient monitoring station.

Applications

- Multipoint analyzer calibration
- Zero and span checks
- Air monitoring stations

Technical data

Measurement range	0–5 / 10 / 20 SLPM; 0–50 / 100 / 200 cm³/min
Accuracy	±1% F.S.
Response time	<60 s (T98)
Interface	RS232; RS485; Ethernet
Power supply	100–240 V AC; 45–55 Hz

Specifications vary with model and configuration. Contact Wattwise to confirm suitability, measurement ranges and available options for your project.
