Wattwise Solutions LLC

Ultra-miniature proportional valves

WW-CMP-101 / WW-CMP-102

Compact proportional gas valves for small analytical instruments and portable monitoring equipment. The valves regulate flow using a low-voltage control signal and can be paired with pressure or flow sensors in a feedback loop. Two standard orifice sizes and integrated inlet and outlet filters support instrument integration.

Applications

• Portable gas analyzers

• Gas chromatography

• Laboratory gas control

Technical data

Interface	0–3 VDC
Power supply	3 VDC / ≤0.8 W
Operating temperature	−20–85 °C

Specifications vary with model and configuration. Contact Wattwise to confirm suitability, measurement ranges and available options for your project.
