Wattwise Solutions LLC

Miniature proportional valve family

WW-CMP-103

A configurable gas-flow valve family controlled through DC voltage, pulse-width modulation or feedback control. The compact assembly suits analytical gas paths where proportional adjustment is required. Orifice, voltage, material and housing options are selected against the gas medium and the required inlet and outlet pressures.

Applications

- Gas chromatography
- Mass spectrometry
- Electronic pressure control

Technical data

Interface	DC / PWM
Power supply	12 / 24 VDC / ≤2 W
Operating temperature	0–50 °C
Weight	60 g

Specifications vary with model and configuration. Contact Wattwise to confirm suitability, measurement ranges and available options for your project.
Manufacturer: Sheens
