Wattwise Solutions LLC

Semiconductor laser gas analyzer

WW-IND-109

A laser absorption analyzer for online gas concentration measurement across an industrial process. The measurement uses the attenuation of selected laser wavelengths through the gas path. The source describes operation in demanding process environments; the exact model configuration and installation requirements must be confirmed for each inquiry.

Applications

- Industrial process gas monitoring
- Harsh process environments

Technical data

Measurement method	DLAS

Specifications vary with model and configuration. Contact Wattwise to confirm suitability, measurement ranges and available options for your project.
