Wattwise Solutions LLC

Infrared Thermographic Camera

WW-PRT-005

An infrared camera for noncontact temperature imaging across a monitored area. The catalog describes remote operation, multiple target imaging and different mounting arrangements. Thermal images provide a visual temperature distribution, with configurable use in handheld, stand mounted or vehicle mounted inspection and temperature screening workflows.

Applications

• Noncontact thermal imaging

• Temperature screening

• Remote temperature observation

Technical data

Measurement range	7.5–14 µm

Specifications vary with model and configuration. Contact Wattwise to confirm suitability, measurement ranges and available options for your project.
