Wattwise Solutions LLC

Compact Water Parameter Analyzer

WW-WAT-001

A multiparameter analyzer for environmental water and industrial effluent monitoring. Configurable sensors support up to four water parameters plus temperature, with several installation arrangements described in the catalog. Plug and play connections, cleaning functions and compensation features support routine operation and sensor maintenance.

Applications

• Industrial effluent

• Environmental water monitoring

• Multiparameter sensing

Technical data

Measured parameters	pH, TSS, COD, EC
Interface	6 × 4–20 mA
Power supply	100–240 V AC, 50/60 Hz; 24 V DC

Specifications vary with model and configuration. Contact Wattwise to confirm suitability, measurement ranges and available options for your project.
