Wattwise Solutions LLC

Integrated Water Monitoring System

WW-WAT-002

An integrated water monitoring system combining sampling, sensors, power distribution and data processing. The catalog describes indoor and outdoor configurations, including a solar panel option. Modular construction, automated cleaning and calibration functions support unattended monitoring and periodic maintenance across suitable environmental and process water applications.

Applications

- Environmental water monitoring
- Remote water stations
- Integrated sensor monitoring

Technical data

Interface	RS485 MODBUS RTU; 5 × 4–20 mA; 2 × relay
Power supply	220 V AC
Dimensions	1550 × 600 × 900 mm

Specifications vary with model and configuration. Contact Wattwise to confirm suitability, measurement ranges and available options for your project.
Manufacturer: FPI
