Wattwise Solutions LLC

Compact Water Quality Station

WW-WAT-003

A compact online station for water quality monitoring in clean media. The configuration combines probes, a controller and a pump to collect samples, analyze measurements and transmit data. Remote calibration and sensor cleaning functions support routine operation, while the modular arrangement allows additional measurement parameters.

Applications

- Clean water monitoring
- Remote water quality stations
- Multiparameter networks

Technical data

Measured parameters	TP, TN, NH3-N, EC, pH, DO
Interface	Ethernet; GPRS/CDMA
Operating temperature	−10–40 °C
Power supply	220 V AC ±10%; 50 Hz ±5%; <1.5 kW

Specifications vary with model and configuration. Contact Wattwise to confirm suitability, measurement ranges and available options for your project.
Manufacturer: FPI
