Wattwise Solutions LLC

Blue-green algae sensors

WW-WAT-120 / WW-WAT-121

Fluorescence-based sensors for continuous monitoring of blue-green algae in water. Temperature compensation and optical filtering support stable measurement, while the digital interface enables connection to monitoring controllers. The family includes standard and compact probes; the standard version incorporates a mechanical cleaning brush.

Applications

- Surface water
- Aquaculture
- Emergency water surveys

Technical data

Measurement range	200–300000 cells/mL
Interface	RS485 / Modbus
Power supply	9–36 VDC
Operating temperature	0–50 °C
Protection rating	IP68

Specifications vary with model and configuration. Contact Wattwise to confirm suitability, measurement ranges and available options for your project.
Manufacturer: Sheens
