Wattwise Solutions LLC

Micro water quality station

WW-WAT-125

A compact station that combines water collection, distribution, probe measurement and data transmission. Its integrated layout supports relocation and installation at constrained monitoring sites. The system is intended for unattended operation, with 4G communication and optional solar power for suitable remote applications.

Applications

- Surface water
- Discharge outlets
- Drainage networks

Technical data

Measured parameters	COD, NH4-N, pH, DO, ORP
Interface	4G
Power supply	220 VAC
Operating temperature	0–50 °C
Dimensions	450 × 350 × 750 mm

Specifications vary with model and configuration. Contact Wattwise to confirm suitability, measurement ranges and available options for your project.
Manufacturer: Sheens
