Wattwise Solutions LLC

Multiparameter water monitoring station

WW-WAT-126

An online station for collecting water quality and drainage-network measurements. It combines sampling, detection, data acquisition and transmission within a compact enclosure. Configurable monitoring factors include water chemistry and hydraulic parameters, with wireless communication supporting remote observation of outfalls and drainage infrastructure.

Applications

- River discharge outlets
- Drainage networks
- Surface water

Technical data

Measured parameters	COD, NH4-N, pH, DO, ORP
Interface	4G
Power supply	220 VAC
Operating temperature	0–50 °C
Dimensions	349 × 257 × 940 mm

Specifications vary with model and configuration. Contact Wattwise to confirm suitability, measurement ranges and available options for your project.
Manufacturer: Sheens
