Wattwise Solutions LLC

Compact water quality monitoring station

WW-WAT-127

A compact water monitoring station integrating sampling, distribution, measurement and data collection. Probe-based analyzers support continuous monitoring without analytical wastewater from reagent reactions. The enclosure can be positioned to suit the monitoring point, with network communication and optional solar equipment available for suitable installations.

Applications

- Surface water
- Municipal wastewater
- Industrial wastewater

Technical data

Interface	Ethernet / 3G / 4G
Power supply	220 VAC
Operating temperature	0–45 °C
Dimensions	1850 × 1300 × 1903 mm

Specifications vary with model and configuration. Contact Wattwise to confirm suitability, measurement ranges and available options for your project.
Manufacturer: Sheens
