Wattwise Solutions LLC

Handheld water sensor reader

WW-WAT-139

A portable reader for compatible pH, dissolved oxygen, conductivity, turbidity, COD and ammonium sensors. It displays live readings, supports sensor configuration and calibration, and exports recorded data through USB. Hot-plug sensor support and battery or USB power suit field measurement and maintenance work.

Applications

• Environmental fieldwork

• Municipal maintenance

• Industrial water checks

Technical data

Interface	RS485 / Micro USB
Power supply	4 × AA / USB
Operating temperature	−10–60 °C
Protection rating	IP67
Dimensions	200 × 101 × 36 mm
Weight	420 g

Specifications vary with model and configuration. Contact Wattwise to confirm suitability, measurement ranges and available options for your project.
