Wattwise Solutions LLC

Wireless water monitoring data terminal

WW-WAT-144 / WW-WAT-149

A battery-powered terminal for remote collection and transmission of water quality, hydrological and system-status data. It stores readings locally and forwards measurements and alarms over a mobile network. The protected enclosure supports deployment alongside remote sensors where a wired data connection is impractical.

Applications

• Remote water monitoring

• Hydrological data collection

Technical data

Interface	NB-IoT / 4G / BLE
Operating temperature	−20–60 °C
Protection rating	IP67

Specifications vary with model and configuration. Contact Wattwise to confirm suitability, measurement ranges and available options for your project.
