Wattwise Solutions LLC

Water quality controllers

WW-WAT-145 / WW-WAT-146 / WW-WAT-147

Controllers for displaying water quality readings and electrode status from connected analyzers. The family supports sensor identification, calibration, data storage and data transmission. Different controller formats provide a central interface for configuring sensors and observing measurements within a water quality monitoring installation.

Applications

• Water monitoring systems

• Sensor calibration

Technical data

Interface	RS485 / Modbus
Operating temperature	−10–60 °C
Protection rating	IP65

Specifications vary with model and configuration. Contact Wattwise to confirm suitability, measurement ranges and available options for your project.
